## Summary

Supply Chain and Procurement professional with 5+ years of experience across enterprise procurement, electronics manufacturing, and construction projects. Certified Six Sigma Green Belt with experience in strategic sourcing, P2P, supplier relationship management, contract lifecycle management, category management, and inventory planning.

Leads sourcing and supplier performance initiatives with Finance, Engineering, Operations, and Quality teams. Uses ERP data and analytics to evaluate costs, manage supply risk, improve delivery performance, and strengthen procurement and supply chain operations.

---

## Professional Experience

### Buyer/Procurement Analyst

**NYRA Inc. - New York, NY**

**Sep 2025 – Present**

- Manage \$20M+ across technology, facilities, logistics, and material categories, leading 10+ RFx events through supplier research, bid leveling, cost-benefit analysis (CBA), BAFO negotiations, and contract award, generated \$540K in verified savings.
- Compared supplier quotations using NPV models that accounted for payment timing and reverse-factoring costs, then used the cash-flow analysis to negotiate pricing and payment terms that reduced total evaluated cost by 9%.
- Execute end-to-end P2P for 100+ monthly POs in SAP Ariba, converting requisitions, managing change orders, and resolving receiving and invoice exceptions, administer workflows, cost centers, purchasing profiles, and access for 75+ users.
- Oversee pricing, amendments, expiration dates, renewals, and SLA obligations for 30+ supplier agreements in Agiloft, introduced earlier review and escalation checkpoints that shortened renewal turnaround time by 20%.
- Cut three-way-match exception resolution time by 45% across a monthly volume of 150+ invoices by tracing discrepancies to PO, receipt, quantity, pricing, or tax data and coordinating corrections with Accounts Payable and suppliers.
- Lead the design of a centralized receiving workflow across three locations, mapping SAP Ariba POs to goods receipt, barcode tracking, damage inspection, internal distribution, three-way matching, and invoice-exception escalation.
- Review demand, material availability, supplier capacity, and lead-time risks with planning, engineering, quality, and finance teams, qualified an alternate source before a single-supplier delay affected scheduled requirements.
- Created a weekly supplier scorecard covering quality, cost, lead time, OTD, and OTIF across three concurrent capital programs, used the results to assign corrective actions, raise delivery performance to 98%, and reduce expedite orders.
- Built an Invoice Before PO dashboard in Power BI that flags confirming orders, contract gaps, invoice-date mismatches, and noncompliant spend by supplier and cost center, supporting executive review of purchasing exceptions.

**Tools: SAP | Agiloft CLM | Power BI | Microsoft Excel**

### Buyer

**Pragathi Micro Instruments - Hyderabad, India**

**Mar 2021 – Aug 2023**

- Executed MRP-driven purchasing in SAP S/4HANA MM for electronic components and PCBs, processing daily exception messages and converting planned orders to POs to maintain 95% on-time delivery across 30+ suppliers .
- Reviewed and maintained BOMs in SAP for R&D and manufacturing assemblies, cross-referencing component requirements against open purchase orders to close coverage gaps before they caused line-level material shortages.
- Owned SAP purchasing parameters including MOQs, order multiples, lot sizes, lead times, and safety stock levels for component SKUs in production, aligning reorder points to demand forecasts and reducing excess stock by 15%.
- Reviewed ECOs with R&D and engineering teams, evaluated supplier capability against revised specifications, and approved or escalated changes in SAP with BOM updates to keep procurement aligned with active build schedules.
- Qualified new suppliers for electronic component categories through capability and price assessments, tracked PPV across the supplier base, flagging cost variances to renegotiate pricing and reallocate spend to lower-cost sources.

**Tools: SAP S/4HANA MM | Excel**

### Supply Chain Analyst

**SRB Construction L.L.C - Hyderabad, India**

**Jan 2020 – Mar 2021**

- Managed PO lifecycle and supplier follow-ups in SAP across 15+ suppliers of structural materials including steel, cement, and concrete; sequenced inbound material flow across concurrent project sites to keep each site supplied ahead of its construction schedule.
- Tracked PPV on commodity categories including steel and cement, benchmarking supplier quotes against published market indices to quantify cost gaps and anchor price negotiations at contract renewals with market-rate data.
- Built supplier scorecards tracking delivery, cost, and quality performance across \$850K in annual spend, scorecard findings identified two underperforming vendors whose contracts were not renewed at the next review cycle.

- Led 5-Why root cause analysis on recurring supply bottlenecks using SAP transaction data, identified root causes, and directed corrective actions with warehouse and site teams that cut production interruptions by 23%.
- Extracted and cleansed SAP procurement data using SQL to build Power BI dashboards tracking PO cycle times, delivery variance, and spend metrics, replacing manual monthly reporting with automated weekly updates.

**Tools:** WMS | SAP | SQL | Power BI | Excel | Minitab

## Supply Chain Coordinator

**Diginique Tech Labs - Mumbai, India**

**May 2018 – Dec 2019**

- Spearheaded cross-functional collaboration between R&D, Quality, and Planning; to implement 25+ ECOs, revision change and BOM updates, with zero delays to production schedules
- Reviewed engineering drawings and material specifications to prepare RFQs and evaluate supplier quotes based on cost, lead time, and MOQ, reducing quote turnaround time by 20% through standardized review and comparison
- Led supplier negotiations and full RFP/RFQ cycles for semiconductor components, leveraging PPV benchmarking and strategic competitive bidding to achieve a \$50K cost reduction
- Streamlined procurement processes by automating data collection, PO tracking, and supplier follow-ups, eliminating 3.33 FTEs of manual workload and improving response times across sourcing activities
- Coordinated inbound logistics and secured competitive freight quotes while ensuring full IATF 16949 / ISO 9001 compliance across customs, documentation, and production workflows

**Tools:** Oracle | Power BI | Agile PLM

---

## Technical Skills

**Buying & Sourcing:** Direct/Indirect material, S2P/P2P Process, PO Management, TCO/TLC, Supplier Sourcing, PPV, Vendor onboarding

**Change/Quality:** ECO/ECR/MCO, EOL, Supplier Quality Audits

**Contracts/Compliance:** ISO 9001, Invoice resolution, Three-way match

**Planning & Inventory:** S&OP, Demand/supply planning, Safety stock, JIT, min/max levels, Reorder Point, E&O

**Systems & Analytics:** SAP, ERP, Oracle, Ariba, Coupa, MRP, Agile PLM, Excel (adv), SQL, Tableau, Power BI

**Certifications:** APICS Supply Chain Procurement (ASCM), Six Sigma Green belt (Kanban, Kaizen)

---

## Education

**Master of Science in Engineering & Operations Management, University of New Haven**

**Aug 2023 - May 2025**

**Relevant Modules:** Industrial Engineering, Supply Chain, Production Planning, Business Analytics, Business Intelligence, Database, System, Business Statistics, Project Management, Operations Research, Forecasting, Time series.

---

## Projects

### Supplier Performance Scorecard.

- Developed a Supplier Scorecard tracking OTD, quality, cost, reschedules, expedite rate, and response time; lowered past-due POs by 55% and drove compliance from 70% to 85%
- Directed supplier performance reviews, presenting KPI findings that led to corrective action commitments and a 15% improvement in on-time-delivery performance for critical components while strengthening supplier relationship

### Inventory Optimization.

- Implemented ABC classification and data-driven min/max and safety-stock levels based on value and demand, replacing static reorder policies and aligning replenishment with consumption patterns
- Built a real-time Tableau dashboard to monitor stock levels and procurement alignment, decreasing excess and obsolete inventory and saving \$30K annually in carrying costs
